* - The field is on the river side of the levee. **NO PARKING** is allowed on the river side of the levee. There are gentle inclined accesses (up and down the levee) at the end of Mill Street and the end of Second Street (Williams Street). There is a hard-surfaced trail running from these access points to the field. One may also walk along the top of the levee to the field area, but a very steep decline is necessary to get to field level. The walk to the field from the Second Street access is shorter than the walk from the Mill Street access. The most direct paths to the field involve a steep climb up and down the levee to reach field level.
